A STATISTICAL SUMMARY, STATE BY STATE, OF SCHOOL
SEGREGATION-DESEGREGATION IN THE SOUTHERN AND BORDER AREA
FROM 1945 TO THE PRESENT. 16TH REVISION.

SOUTHERN EDUCATION REPORTING SER., NASHVILLE, TENN

PUB DATE FEB 67

EDRS PRICE MF-\$0.25 HC-\$1.92 46P.

DESCRIPTORS- *STATISTICAL DATA, *SCHOOL INTEGRATION, *PUBLIC
SCHOOLS, *FACULTY INTEGRATION, *SOUTHERN STATES, CIVIL RIGHTS
LEGISLATION, ELEMENTARY SCHOOLS, SECONDARY SCHOOLS, COLLEGES,
NEGRO STUDENTS, NEGRO TEACHERS, CAUCASIAN STUDENTS, SPECIAL
SCHOOLS, ETHNIC GROUPS, STUDENT ENROLLMENT, BORDER STATES

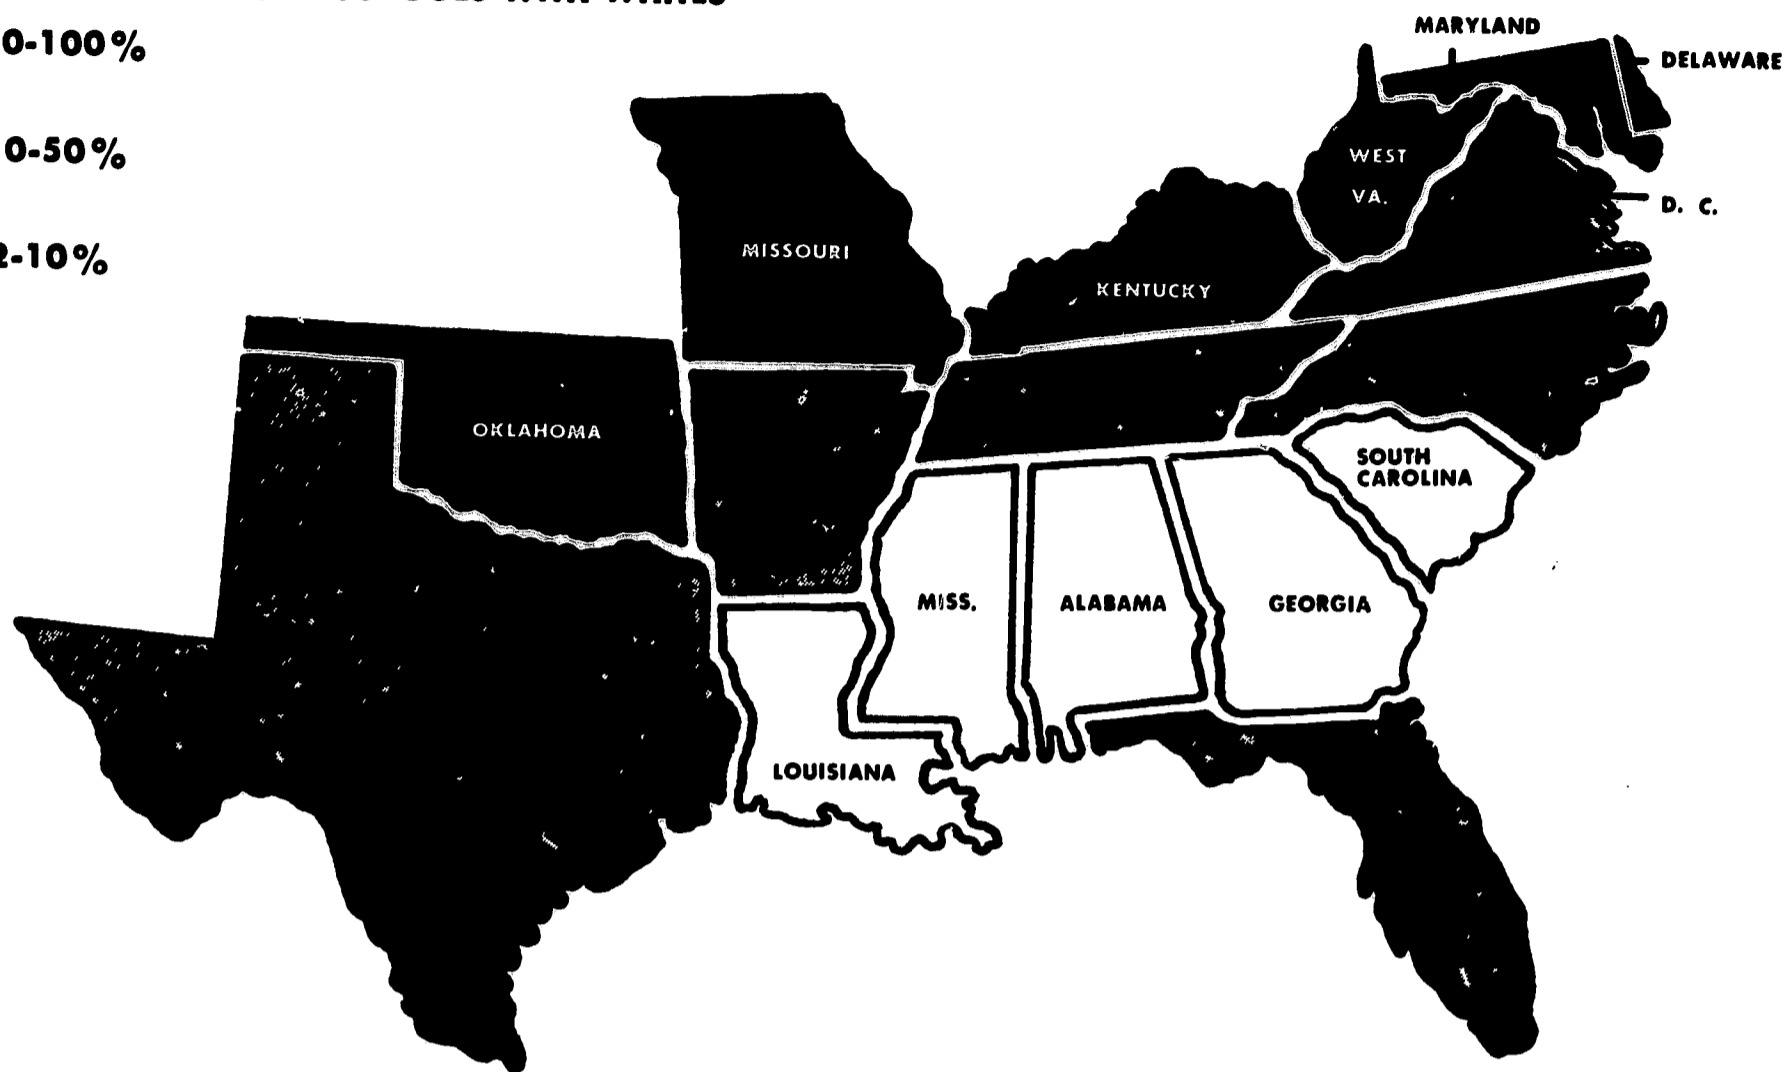

THE FOLLOWING DATA ARE GIVEN IN THIS REPORT TO INDICATE
THE STATUS OF DESEGREGATION IN EACH OF THE SOUTHERN AND
BORDER STATES--(1) RATE OF DESEGREGATION IN PUBLIC SCHOOLS
(ARRANGED BY SCHOOL DISTRICT), PUBLIC COLLEGES AND
UNIVERSITIES, AND SPECIAL SCHOOLS, (2) STATUS OF FACULTY
DESEGREGATION, AND (3) NUMBER OF "OTHER" ETHNIC GROUP
STUDENTS IN THE SCHOOLS. ALSO INCLUDED ARE DESEGREGATION
STATISTICS ON THE SOUTH AS A WHOLE, A DESCRIPTION OF THE
STATUS OF DESEGREGATION SINCE 1954, AND A STATISTICAL SUMMARY
OF DEVELOPMENTS SINCE 1954. (EF)

PER CENT OF NEGROES IN SCHOOLS WITH WHITES

Statistical Summary

1966-1967

A Note from the Editor

Through the 1964-65 school year, Southern Education Reporting Service was the only source for the region's statistics on school desegregation. SERS listed as "desegregated" any school district and any public college and university that (1) had a Negro student actually enrolled with a white student (whether in a formerly all-white or all-Negro school), or (2) declared an official policy of desegregation. Beginning with 1965-66, SERS relied on the official reports of the U.S. Office of Education, Department of Health, Education and Welfare, in specifying those districts "in compliance" with Title VI of the Civil Rights Act of 1964. For 1966-67, USOE conducted its first complete survey of school desegregation in the region and it made available to SERS the computer sheets summarizing the information on a district-by-district basis. USOE reported an 80 per cent return of its questionnaires in the region, but some of these contained garbled or incorrect information because of the complicated technical process. Where the statistical information appeared correct but the district name was illegible, the figures were used and the district name replaced by a dash. The USOE information contained in this edition of the summary was corrected

as of February, 1967, but USOE was continuing negotiations with several districts not in compliance and was receiving additional reports from districts missing from the survey. In several instances, SERS correspondents produced desegregation statistics not available through USOE. Although USOE specified in its survey that each school and each district should send a copy to the "Chief State School Office," several states refused to make this information available because of policies of not reporting records by race. District figures were available from state offices in Arkansas, Delaware, Kentucky, Louisiana, Maryland, South Carolina and Tennessee. Four states refused to release the individual district figures but reported total desegregation statistics for their states: Florida, Georgia, Texas and Virginia. The remaining six states offered no statistics on desegregation: Alabama, Mississippi, North Carolina, Missouri, Oklahoma and West Virginia. The summary lists under each state the different statistics reported: USOE survey and USOE estimates, state, SERS and other private and official sources. The editor of the summary selected one of these for use in the region tables, or combined information from different sources to provide the best available information.

Definition of Terms

Desegregation—Change from segregated to biracial or multiracial status, either in practice or principle. Some school districts had desegregated classes but had not received federal approval of their compliance proposals.

In Compliance—U.S. Office of Education approval of a desegregation proposal offered by a public school district or a public college or university. A school district can act to comply with the Civil Rights Act of 1964, in order to remain eligible for federal aid to education, by one of three methods: Signing an HEW-441 "Statement of Compliance," submitting a court-ordered desegregation plan, or adopting a

voluntary plan of desegregation and signing an HEW-441B.

Integration—Absence of all racial distinctions.

Districts With Negroes and Whites—A district having both Negro and white students, whether the district is segregated or desegregated.

Negroes With Whites—Used in tables for number of Negroes attending schools with whites.

Predominantly White; Predominantly Negro — Both terms used in tables on colleges and universities, to designate those schools either all-white or predominantly white, or those all-Negro or predominantly Negro in enrollment.

THE REGION

Public Elementary and High Schools

Table One below summarizes the SERS statistics on school desegregation for 1966-67. Table One shows for Arkansas, as an example, that the state had 406 school districts, including 222 with whites and Negroes, and that 391 of the 406 are in federal compliance and 12

are not. (The USOE total of districts differs from the Arkansas official figure.) The state has 337,920 whites and 119,817 Negroes in public elementary and high schools this school year, with the USOE estimating that 18,100 Negroes, or 15.1 per cent of the state's total Negro enrollment, actually attend schools with whites.

¹ The sum of districts in and not in HEW compliance does not equal the state total because the Office of Education reports a different number of districts from that given by the State Department of Education.

² USOE estimate ³ Unofficial estimate ⁴ 1965-66

Table Two below summarizes the actual figures reported by the U.S. Office of Education, as of February, 1967. Again using Arkansas as an example, USOE lists the state with 403 school districts. Of those in compliance, 233 signed form HEW-441, nine followed court orders, and 149 adopted voluntary desegregation plans and signed form HEW-441B. Of those not in compliance, one district has had its new federal funds deferred, formal enforcement action is in the process for eight others, and all federal funds have been

terminated for three districts. In the USOE survey, Arkansas school districts reported at least 355 desegregated schools attended by 151,970 whites and 12,924 Negroes. From this, USOE estimated the state had 18,100 Negroes attending schools with whites. In addition, the state has at least 398 students of other races or nationalities attending desegregated schools. The District of Columbia is not included in USOE statistics.

¹ USOE estimate projected on basis of school districts reporting and on estimated total Negro enrollment.

² "Others" include "racial or national-origin group for which separate schools in the past have been maintained or . . . significant minority groups in the community."

³ D.C. not included.

Teachers

For the first time, school desegregation statistics are available on a region basis for teachers in public elementary and high schools. The USOE collected these statistics in its November, 1966, survey, and the figures listed below were corrected and updated as of February, 1967. In the 1965-66 school year, only Mississippi and Louisiana retained complete segregation of teach-

ers. Every state had some teacher desegregation in 1966-67. The desegregation process and the closing of all-Negro schools resulted in the discharge or demotion of Negro teachers in several states. On the other hand, some states had special programs to relocate displaced Negro teachers.

Public Colleges and Universities

Every public college and university in the region is in federal compliance, although not all have both races enrolled. Many schools insist they no longer keep records by race and some of these refuse to make head counts to determine racial composition. The U.S. Office of Education did not include institutions of higher learning in its first official survey of school desegregation. The table below lists the best figures obtainable by SERS correspondents. It shows, for example, that

Alabama has eight predominantly white colleges and universities, with a total white and Negro enrollment of 33,839 students, and two predominantly Negro schools with a total white and Negro enrollment of 3,322 students. The state has 295 Negroes attending desegregated, predominantly white schools, and 1,420 Negroes attending desegregated, predominantly Negro schools. Alabama has one predominantly white school with a desegregated faculty, but none of the predominantly Negro schools have faculty desegregation.

⁴Represents total enrollment of both races at each type of institution.

⁵Estimated.

Faculties

Arkansas is the only state to retain completely segregated faculties in all its public colleges and universities, both predominantly white and predominantly Negro. Louisiana and Virginia do not have any faculty desegregation at a predominantly white school. The other Southern states and all the border states have begun desegregating faculties at their predominantly white schools of higher learning. The "Public Colleges and Universities" table above shows the number of institutions known to have desegregated faculties.

Special Schools

Only Alabama and Mississippi retain complete segregation in their special schools—ones for the blind, deaf, dumb, orphan, exceptional, retarded or delinquent children—and their trade schools. All programs receiving federal funds for education are required to end discrimination.

Ethnic Groups

States having such mixed blood or ethnic groups as Moors, Turks and Indians have accepted them in

schools with whites, sometimes under court orders. The federal government continues to operate some separate schools for Indians on reservations. The USOE survey of school desegregation includes statistics on "Others" attending schools with whites. "Others" was defined as "any racial or national-origin group for which separate schools have in the past been maintained or which are recognized as significant 'minority groups' in the community."

Private Schools

Several states have experienced considerable growth of private schools for whites who want to avoid attending desegregated schools. Four states—Alabama, Louisiana, Mississippi and Virginia—currently award state tuition grants to attend private schools. The grants have been under considerable legal attack, having been stopped completely in South Carolina and limited by court decisions elsewhere for use only in private, segregated schools where the state money does not provide the preponderant financial support.

In Desegregated Schools*	164,877	12,000 4.4%	176,877

*USOE Survey.

The first desegregation at this level in Alabama occurred with the opening of the 1963-64 term in Birmingham, Huntsville, Macon County (Tuskegee) and Mobile, all by federal court orders. Huntsville actually began desegregated classes on Sept. 9, 1963, a day before the other three districts. The admission of Negroes to the formerly all-white schools in all four districts had been blocked by state troopers acting under the orders of Gov. George Wallace. President John F. Kennedy federalized the Alabama National Guard on Sept. 10 and all five U.S. district judges in Alabama issued an order restraining further interference by the governor. In 1966-67, the state had 52 of its 118 school districts not in compliance with the desegregation guidelines of the U.S. Office of Education. These 52 included two, Bibb County and Tarrant, which had all federal funds cut off, and 50 with funds deferred or cut-off requested by USOE. State and local officials, under pressure of Gov. George C. Wallace and the 1966 legislative acts nullifying compliance agreements, refused to report any school statistics locally. The U.S. Office of Education received reports showing 277 desegregated schools with 164,877 whites and 6,430 Negroes. On the basis of these returns, the USOE projected that the state had 12,000 Negroes in schools with whites. The USOE table follows:

Teachers*	19,131	9,786	28,917
On Desegregated Faculties**	752	1,072	1,824

*1964-65, last year available

**Reported to USOE, see table above.

Teacher desegregation began in the state in 1965-66, with some isolated transfers of Negro teachers to white schools in areas where Negro schools were closed to facilitate desegregation and where the Negro population was low.

Public Colleges and Universities

	Predom. White	Predom. Negro
Institutions*	8	2
Enrollment**	33,839	3,322
Negroes in Biracial Schls.	295***	1,420

*All in Compliance **1964-65 ***Minimum estimate

Three of the state's seven predominantly white institutions of higher learning first desegregated by court order, and one of the two predominantly Negro schools voluntarily accepted a white student for a 1963 summer session. The University of Alabama first desegregated in February, 1956, when Autherine Lucy attended for several days by order of a federal court in *Lucy v. Adams*. She was driven from the campus by rioting and the Board of Trustees later expelled her for accusing university officials of conspiring in the disorders. The federal court upheld the expulsion but the school remained under permanent injunction to admit qualified Negroes. When three Negroes sought admission to the school in 1963, their suit, *Malone v. Mate*, was combined with the *Lucy* case and they were admitted in June, 1963, under the original order. Gov. George Wallace, who had campaigned on a pledge to "stand in the schoolhouse door" and to block any desegregation efforts, attempted to stop the admission on the

main campus June 11, but he withdrew when President John F. Kennedy federalized the Alabama National Guard. Two of the Negroes were accepted by the school and the third enrolled without incident two days later at the Huntsville extension center. All state-supported colleges and universities signed federal compliance statements in 1965-66. Enrollments at the state-supported schools for 1964-65, the last year they were available, and estimates of minority enrollments for 1966-67 follow:

Predominantly White	Total Enrollment†	Negroes††
Alabama College	1,376	0

Totals	3,322	7

†1964-65

††Minimum estimates

*Includes main campus and two centers; President Ralph Adams denied presence of any Negroes but other sources reported one Negro student.

**Includes main campus, medical college, and six centers.

Faculties

The University of Alabama Medical School in Birmingham has two Negro M.D.'s on the teaching staff. Alabama State, the predominantly Negro school, has faculty members from India, the Philippines, China and the West Indies, but no native whites.

Special Schools

The state has 11 vocational technical schools but it is not known if the eight for whites and three for Negroes have desegregated.

Ethnic Groups

The USOE survey listed 1,114 "other" students in desegregated schools.

Private Schools

Alabama provides state tuition grants of \$185 a year. The first Alabama private school that opened because of desegregation was Macon Academy, begun in 1963. Other private schools were formed in 1964-65 in Greene, Marengo, Hale, Dallas (Selma) and Perry counties, and in 1966-67 at Lowndesboro in Lowndes County.

*Spring, 1966 **USOE Survey

The state's first desegregation was at Charleston and Fayetteville, both in 1954, both voluntary. Up to February, 1967, 12 districts had been reported not in compliance. Of the 391 districts in compliance, 233 signed HEW-441, nine followed court orders, and 149 signed HEW-441B. Three districts have had all federal funds terminated. Bright Star (all white), Hagen and Humnoke. The table below lists the statistics received by the U.S. Office of Education from districts reporting desegregated schools. The USOE totals for all the reporting districts were: 355 desegregated schools; 151,970 whites and 12,924 Negroes in desegregated schools. On the basis of these incomplete reports, the USOE estimated the state had 18,100 Negroes in schools with whites in 1966-67.

*1964-65

**USOE figures, see table above.

Little Rock had four white and four Negro teachers in desegregated situations in 1965-66 but segregation generally was maintained at this level in the state until 1966-67. No district was known to be refusing teacher desegregation this year. In the district-by-district table above, Little Rock shows 299 whites and 200 Negroes on desegregated faculties. Other sources report that 19 white teachers are on predominantly Negro faculties, and 22 Negroes are on predominantly white faculties. Similar figures are, for North Little Rock, 5 whites and 11 Negroes, and for Pine Bluff, 2 whites and 12 Negroes.

Public Colleges and Universities

	Predom. White	Predom. Negro
Institutions*	7	1

Totals	28,857	303
Predominantly Negro		
Ark. AM&N	3	2,200
State Totals	28,860	2,503

Faculties

No college has a desegregated faculty. No Negro teachers have lost jobs due to desegregation.

Special Schools

The state maintains schools for the blind, the deaf, the retarded and handicapped, the incorrigibles and delinquents and vocational-technical schools at the high school level. All except those for the incorrigible and delinquent (which have the word "school" in their titles but are actually penal institutions) submitted voluntary desegregation plans under the Civil Rights Act.

Ethnic Groups

As far as known, all children in these groups attend regular public schools with whites. The USOE Survey listed 398 "other" students in desegregated schools.

Private Schools

Desegregation is known to have prompted the formation of two private schools in Arkansas. One operated during the year the four Little Rock High schools were closed during the 1958-59 school desegregation crisis. White parents in Marwell School District, Phillips County, opened a private school in August, 1966. Federal courts have stopped several state laws designed to provide financial aid to private schools or their students.

		100%	

Arden and Claymont were the first Delaware districts to desegregate, voluntarily admitting Negroes to schools with whites in 1953. New Castle County was a defendant in the original School Segregation Cases decided by the U.S. Supreme Court in 1954 (*Belton v. Gebhart*). Nine districts desegregated voluntarily. Then in 1960 a federal court ordered the state's grade-a-year plan ended and complete desegregation started in all grades and schools for the 1961-62 year—the first statewide desegregation order in the region. By November, 1965, all of the state's school districts had received federal approval of their desegregation proposals. For 1966-67, the state still had all districts in federal compliance and the state became the first in the region to have all of its Negro students actually attending schools with whites. Twenty districts signed HEW-441 and 30 signed HEW-441B. The state reported a total Negro enrollment of 21,333 and the U.S. Office of Education reported 22,500. The following table contains information based on both the state and federal reports:

Faculties

The University of Delaware has one Negro on its 400-member faculty at present, although at one time it had two Negroes. The predominantly Negro Delaware State has an estimated 17 non-Negroes on its faculty, which includes Chinese and others as well as whites.

Special Schools

Delaware does not maintain any special schools, as such, for the blind, deaf, dumb, etc. Instead, schools themselves operate such units in rooms inside the regular school buildings. Such classes are open to members of all races.

Ethnic Groups

Delaware's Constitution called for separate schools for Indians, Moors, Negroes and whites. In the desegregation process, the small schools for ethnic groups were dissolved.

DISTRICT OF COLUMBIA

Public Elementary and High Schools

D.C. constitutes a single desegregated school district.

	White	Negro	Total
Enrollment	13,369	133,275	146,644
In Desegregated Schools	12,729	114,976 86.3%	127,705

Complete desegregation began in 1954 after the U.S. Supreme Court's ruling in *Bolling v. Sharpe* and the other School Segregation Cases. For the 1966-67 school year, the District has 30 all-Negro schools with an enrollment of 18,299 students. One all-white school (Americanization School) has 640 students. The white-Negro ratio continued its change: From October, 1965, to October, 1966, the Negroes in elementary and secondary schools increased by 4,432, while the whites dropped by 1,804. The percentage of Negro enrollment is now 90.8.

Teachers

	White	Negro	Total
Teachers*	1,336	3,638	4,974

*1963-64, last available; Includes Teachers College faculty

All faculties in the District school system are desegregated. No racial distinctions are made in either hiring or assigning teachers to schools, including Teachers College faculty.

Public Colleges and Universities

	Predom. White	Predom. Negro
Institutions*	0	1
Enrollment	0	1,505
Negroes in Biracial Schls.	0	1,294

*In Compliance

D.C. Teachers College is the only strictly public college in the District. The school resulted from the merger of the district's two uniraical colleges in 1954.

Special Schools

All are desegregated in practice or policy.

U. S. Civil Rights Acts

Civil Rights Act of 1957—Established U.S. Commission on Civil Rights, to collect and study information on denial of equal protection of the laws, to appraise the laws and policies of the federal government in this area, and to report findings to Congress and the president; and provided for appointment of additional assistant attorney general, elevating the civil rights section of the Department of Justice to the status of a division.

Civil Rights Act of 1960—Strengthened measures available to the federal government for dealing with obstructions of court orders and burnings of schools and churches; and allowed government to provide

schooling for children of military personnel where not available otherwise.

Civil Rights Act of 1964—Directed U.S. Office of Education to report to Congress in two years on minorities in nation's schools ("Equal Educational Opportunities," Coleman-Campbell); authorized Office of Education to give technical and financial assistance on request to local school systems desegregating; authorized U.S. attorney general to file desegregation suits on behalf of public schools and colleges under certain conditions; provided for withholding funds from segregated schools; and created Community Relations Service as a conciliation agency.

*Florida Department of Education

The first school district in the state to desegregate, Dade County (Miami), acted voluntarily in 1959 in advance of a court order. In 1965-66, all 67 county school districts had received federal approval of their desegregation proposals, and Florida was the first Southern state to have all districts in official compliance with the Civil Rights Act of 1964. For 1966-67, all districts were in compliance except two. Pasco County, which is desegregated, has filed a court suit contesting the USOE guidelines. Three signed HEW-441, 46 signed HEW-441B, and 16 are under court order. For 1966-67, the State Department of Education reported 64,574 Negroes in schools with whites, or 22.3 per cent. The U.S. Office of Education received reports from all but a few districts and estimated the state total at 60,000 Negroes in desegregated schools. The USOE survey, which listed 664 desegregated schools with 454,827 whites and 42,517 Negroes follows:

County Districts	Deseg. Schls.	In Deseg. Schools		Deseg. Teachers

**Based on reports to USOE and Dade County special report

Two counties, Dade and Sarasota, had desegregated teaching staffs before all Florida counties accepted the principal of faculty desegregation under the 1965-66 federal guidelines. For district figures, see table above.

Public Colleges and Universities

	Predom. White	Predom. Negro
Institutions*	29	1
Enrollment	132,330	3,482
Negroes in Biracial Schools	9,928	0

*All In Compliance

The first Negro to attend the University of Florida, George H. Starke, enrolled in the Law School in September, 1958, by a court order in *Hawkins v. Board of Control*. The university enrolled its first Negro undergraduates for 1962-63. By 1965-66, all five branches of the Florida university system and all county junior colleges were in compliance with federal regulations. For the 1966-67 school year, the state completed phasing out all of its predominantly Negro junior colleges. Some combined the campuses and others retained both campuses but desegregated each. Dade County (Miami) for example had 13,838 whites and 820 Negroes at one campus of its junior college and 3,603 whites and 270 Negroes at the other campus. Enrollments by race follow for the schools, where available:

State Totals	122,402	13,410
*Estimated		

Faculties

Florida State University and Florida A&M University have had a faculty-exchange program, involving a number of professors and instructors. An estimated 150 Negroes hold teaching and administrative positions at the 25 county junior colleges. With the closing

of the last predominantly Negro junior colleges, some faculty members transferred to the predominantly white colleges, but many reportedly reverted to positions in the county secondary schools or lost their jobs. The predominantly white universities have Negroes in staff positions but none at the professor level.

Special Schools

An official policy of desegregation is in effect at all state schools, including three industrial schools for

boys and two for girls. The Florida State School for Deaf and Blind at St. Augustine has a desegregation policy.

Ethnic Groups

All Indians go to regular white schools except those attending two federally operated schools on federal reservations at Dania and Brighton. The USOE survey listed 3,302 "other" students in desegregated schools.

**USOE Survey

Negroes first entered schools with whites in Atlanta in August, 1961, under federal court order. An estimated 20,436 Negroes are now in predominantly white schools, according to the State Department of Education. The U.S. Office of Education reported an estimated 34,300 Negroes attending with whites in schools either predominantly white or predominantly Negro. Of the 195 school systems (USOE lists 196), 151 are in compliance, five signed HEW-441, 9 are under court orders, and 137 signed HEW-441B. The 42 districts not in compliance include five that have had all federal funds terminated: Glascock, Randolph, Seminole, Terrell and Toombs counties. The state reported these figures on the number of Negroes in formerly all-white schools, only by congressional districts:

Congressional District	1965-66	1966-67
First	467	447
Second	348	1,766
Third	305	557
4th & 5th	6,419	7,855
Sixth	578	1,172
Seventh	412	3,834
Eighth	199	1,666
Ninth	316	1,087
Tenth	421	2,052
Totals	9,465	20,436

Figures reported to the U.S. Office of Education showed 692 desegregated schools with 388,981 whites and 29,376 Negroes. On the basis of these figures, the USOE estimated 34,300 Negroes were attending schools with whites in Georgia. The district-by-district figures received by USOE follow:

The University of Georgia, the first to desegregate, admitted two Negroes in January, 1961, under court order in *Holmes v. Danner*, briefly suspended them because of disorders on the campus, then readmitted them under court order. In 1959, a U.S. District Court had prohibited consideration on the basis of race for admission to Georgia State College, although the plaintiffs in the case (*Hunt v. Arnold*) were not ordered admitted. Georgia State voluntarily accepted

its first Negro student in the summer, 1962. All schools in the university system have signed compliance statements, but two of them—Middle Georgia College and North Georgia College—remain all white and one—Albany State—remains all Negro. An estimated 475 Negroes are believed attending predominantly white schools, but no figures are available by race. Six whites attend predominantly Negro schools.

Faculties

Three of the predominantly white schools and all three predominantly Negro schools have desegregated faculties. Georgia State has one Negro among its 280 faculty members and the University of Georgia and West Georgia College have an unknown number of Negro faculty members. At the Negro schools, the white faculty members are in number: Albany State, two; Fort Valley, one; and Savannah State, seven (and three other non-Negroes).

Special Schools

The state's school for the mentally retarded is desegregated, as are the state schools for the blind, deaf, mute and delinquent children. Numerous vocational-technical schools have desegregated.

Ethnic Groups

The USOE survey listed 1,919 "other" students in desegregated schools.

Private Schools

Private schools exist in the state's larger population areas of Georgia but only one has opened in a small town. John Hancock Academy in Sparta opened in August, 1966, with 203 students, nearly half the white children of school age in Hancock County. The county has the highest Negro-to-white ratio of any in the state and opposition to public-school desegregation was strong.

*State Dept. of Education report

In 1955, when desegregation began, there were 348 all-Negro schools in Kentucky. The first desegregation came on June 6, 1955, when a Negro girl entered summer school in Fayette County. By fall of 1966, state officials said only 12 all-Negro schools remained and 851 schools in the state have desegregated their student body or faculty—or both. Desegregation in the state was spurred in some cases by lawsuits and beginning in 1962-63, by State Department of Education persuasion. In 1966 the state established a fulltime position of desegregation coordinator. Of the 200 school districts in the state, 165 signed an HEW-441, 30 the HEW-441B, and five others desegregated under court orders. The district figures below (with noted exceptions) come from the U.S. Office of Education survey, which listed 577 desegregated schools with 294,817 whites and 27,094 Negroes.

On Desegregated Faculties*	17,091	1,507	18,598

*State Department of Education

In 1954-55 there were 1,279 teachers in the all-Negro schools, putting the proportion of Negro teachers at about 6.4 per cent of a total professional staff of about 20,000. By 1963-64 the total staff had grown to 26,523. But the number of Negro teachers had decreased proportionately, to 1,502—or 5.7 per cent of the total. The downward trend continued during the 1965-66 term. There were 1,389 Negro classroom teachers (fulltime), representing 5.4 per cent of the total full-time staff. The ratio for 1966-67 is 5.6 per cent of the total. The ratio of the current Negro pupil population to the total pupil population, however, is 9 per cent. Most observers feel the change is due mainly to pressure from the federal and state education offices, the State Board of Education and the State Commission on Human Rights, which on July 1, 1966, became empowered by law to act in cases of job discrimination against teachers. In 1965 the commission had reports of 55 to 60 cases of Negro teachers or administrators who, because of their race, had been fired, threatened with dismissal or demoted between the spring and fall terms. Considerable publicity attended a number of these cases. In 1966 only a few such cases were re-

ported and the state applied increased pressure on districts to keep Negro teachers and hire new ones as more classrooms became desegregated. For district-by-district figures, see the table above.

*All In Compliance

**1965-66; racial breakdown and totals are unofficial estimates.

All eight tax-supported colleges and universities are desegregated in practice. Only the University of Kentucky and Paducah Junior College desegregated under court order. The university first admitted Negroes to the graduate schools in June, 1949. The school's undergraduate divisions were opened to Negroes voluntarily in 1954. All but the university's athletic teams are desegregated. In December, 1965, however, the university signed the first Negro to a Southeastern Conference athletic grant in aid. All the university community colleges have biracial enrollments. The following table includes 1965-66 enrollments. Racial breakdowns are unofficial, based on estimates from campus sources and other state education officials.

Predominantly White	White	Enrollment*	Negro
Eastern Ky. State	6,849		110

---	-------	-------

STATE TOTALS	49,962	2,660
---------------------------	---------------	--------------

*Totals include full and parttime students.

**Most white students at Kentucky State attend evening credit courses. Daytime white enrollment is increasing, however.

Faculties

Among tax-supported institutions, only the University of Louisville, the University of Kentucky, Morehead State and the predominantly Negro Kentucky State College had both white and Negro faculty members in 1965-66. The University of Louisville reported three Negroes; Kentucky State, 10 whites; Morehead and the University of Kentucky, one Negro each. Eastern Kentucky had a Negro staff member in the summer of 1965. Eastern and Western were reported to be actively seeking to recruit Negro faculty members for 1966, as was the University of Louisville.

Special Schools

All state vocational schools, institutions for the blind, deaf, retarded and delinquent children are open to Negroes. In 1963, the State Board of Business Schools adopted an anti-discrimination regulation aimed at opening all business schools to Negroes. In 1961, the state accepted five Negroes at the previously all-white Kentucky Children's Home at Lyndon. In the past, the state had provided care for dependent Negro children in foster homes. The Lincoln Institute, a state-supported boarding high school in Shelby County for Negroes, was closed at the end of the 1966 school term on recommendation of a state economy commission. The school will become an academy for bright, but deprived, Kentucky high school pupils. Opening was set for fall, 1966, but then postponed for at least one year.

Ethnic Groups

The USOE survey lists 960 "other" students in desegregated schools.

Orleans Parish (New Orleans), first district to desegregate, began with a grade-a-year plan in November, 1960, by order of federal court. Admission of Negroes was accompanied by protest demonstrations by whites and a series of delay attempts by state officials and the legislature. By February, 1967, 46 of the 67 school districts had received federal approval of their desegregation proposals: None signed a HEW-441 form; 43 submitted court-ordered plans; three signed HEW-441B. The state has 21 non-complying districts and all federal funds have been terminated for the following 17 parish (county) systems:

Avoyelles	Franklin	St. Bernard
Caldwell	Grant	Tensas
Cameron	Morehouse	Union
Catahoula	Ouachita	West Carroll
De Soto	Red River	Winn
East Carroll	Sabine	

The USOE received reports showing 174 desegregated schools attended by 118,086 whites and 4,201 Negroes. The state Department of Education figures, combined with USOE figures and those from other sources, show 10,697 Negroes in schools with whites. The available figures on Louisiana follow:

†Not Available

Louisiana State University at Baton Rouge began admitting Negroes to its graduate divisions in 1950 by court order (*Wilson v. LSU Board of Supervisors*). All 13 colleges and universities desegregated under court orders. Most, if not all, have Negroes enrolled and there was some enrollment of whites in predominantly Negro institutions. Exact figures were unavailable because of an official policy of registration without regard to race.

Faculties

Although records do not indicate race, more than 25 whites are believed to be teaching in Negro institutions.

Special Schools

Louisiana operates 23 trade and vocational schools for whites and five for Negroes, and largely supports an independent trade school. All have desegregated by federal court orders and by directives of the State Board of Education dating to Sept. 18, 1962.

Ethnic Groups

On Aug. 28, 1963, a federal court ordered immediate enrollment of Indian children and enjoined denial of admission to predominantly white schools in Terrebonne Parish (*Neugin v. Terrebonne Parish School Board*). Previously four elementaries and one high school were designated for children of Indian descent.

Private Schools

Tuition grants of up to \$360 a year are authorized through the Louisiana Financial Assistance Commission. The grants were not available for use in parochial schools. The state had some 11,000 pupils receiving state funds to attend private schools before citizens in Plaquemines Parish quickly established five private schools during 1966-67, when the public schools desegregated by court order.

In Desegregated Schools	408,178	121,359	629,537
		65.3%	

Baltimore was the first district to desegregate: In 1952-53 a small number of Negroes were admitted to an advance college preparatory curriculum at one high school; citywide desegregation began in September, 1954, when 1,376 Negroes entered 50 formerly all-white schools. All districts were desegregated in principle by 1957-58 but as late as 1963-64 there were three without actual desegregation. Desegregation was voluntary in all instances although court cases were a factor in three districts. On Jan. 30, 1962, the Maryland Board of Education re-emphasized state policy in calling upon local school boards to guarantee transfers, transportation and assignments "without regard to race." In the fall of 1964, all of Maryland's 23 biracial districts had some Negroes attending schools with whites, and by November, 1965, all 24 districts (including one all-white system) had received federal approval of their desegregation proposals. For 1966-67, nine signed an HEW-441 form and 15 signed HEW-441B. Eleven districts have no all-Negro schools. The USOE survey listed 689 desegregated schools with 408,178 whites and 46,221 Negroes. From this, USOE estimated 128,800 in schools with whites. Desegregation data by the Maryland Department of Education follows:

On Desegregated

	White	Negro	Total
Faculties	22,454	5,395	27,849

No teachers are known to have been fired because of desegregation. State policy from the outset has

called for reassigning Negro teachers as all-Negro schools were closed. For several years there have been complaints that some districts were not hiring new Negro teachers as readily as new white teachers. Also, there have been two complaints that Negro principals were downgraded when their Negro schools were closed and that they were reassigned to desegregated schools. In some instances the Negro teachers are desegregated by virtue of there being one or several white teachers on predominantly Negro staffs. All biracial districts have some desegregated staffs, and in 17 all-Negro teachers are in schools that have some staff desegregation. See table above.

Public Colleges and Universities

†Minimum estimate.

Faculties

Negroes serve as faculty members at the University of Maryland and at least six of the two-year colleges: Allegany, Baltimore, Charles, Essex, Frederick and Prince Georges. All four of the predominantly Negro

senior colleges have some white faculty members, most notably Bowie, where a third are white, and Maryland State, where a fourth are. No Negro faculty members have been reported at the three predominantly white four-year state colleges.

Special Schools

The four state training schools for delinquent youths (two for boys and two for girls) were desegregated in 1961 following a state court ruling that continued segregation would be unconstitutional. The Maryland School for the Blind desegregated voluntarily in 1954,

as did the Maryland School for the Deaf. The Rosewood Training School for mentally retarded children admitted Negroes voluntarily (a court suit to stop desegregation failed) in 1954. The Esther Loring Richards Children's Center for emotionally disturbed children opened in 1958 as a desegregated institution, as did the Jacob E. Finesinger Unit, also for disturbed children, in 1961. Racial statistics are not available.

Ethnic Groups

The USOE survey listed 429 "other" students in desegregated schools.

The first Mississippi public school district desegregated on Aug. 31, 1964, when 16 Negro children attended four first-grade classes with whites in Biloxi under federal court orders. First-grade desegregation, all under court order, also began that September in Jackson, Leake County and Clarksdale. For 1966-67, the state had 94 districts in compliance: 37 under court orders and 57 signed HEW-441B. Of the 55 districts not in compliance, 10 have had all federal funds cut off: Copiah County, Covington County, Grenada, Hazlehurst, Hinds County, Jefferson County, Noxubee County, Tunica Co., Warren County and West Jasper County. The USOE survey listed 185 desegregated schools with 96,799 whites and 4,747 Negroes, and from this, estimated the state had 8,300 Negroes attending with whites. The USOE survey combined with statistics from other sources totals 7,258 Negroes in desegregated schools. The USOE survey follows, with additions from the other sources.

**1965-66

The University of Mississippi at Oxford was desegregated on Oct. 1, 1962, when a Negro transfer student,

James Meredith, enrolled by court order in *Meredith v. Fair*. Riots occurred on the campus when Meredith arrived on the campus a day earlier, accompanied by a force of federal marshals. President Kennedy sent in regular troops and called part of the Mississippi National Guard to active duty to restore order. Meredith was graduated in June, 1963, still under protection of federal marshals. Dr. E. R. Jobe, executive secretary of the Board of Trustees of State Institutions of Higher Learning, announced in April, 1965, that all eight state-supported, four-year colleges had signed compliance agreements. All institutions are in federal compliance. College enrollments were:

***Estimated minimum.

Faculties

The University of Mississippi Medical School in Jackson named a Negro to its faculty in 1965. The Medical School faculty is the only one in the state known to have desegregated.

Special Schools

Complete segregation is maintained.

Ethnic Groups

The state has no separate schools for Indians or other such groups, but the federal government has schools for Indians in a few counties. The USOE survey listed 18 "other" students in desegregated schools.

Private Schools

State tuition grants of \$185 a year are available to attend private schools and an estimated 2,000 students reportedly attend private segregated schools, although not all of them receive grants. Mississippi chartered 61 private schools following enactment of the grant law in 1964.

**USOE Survey

Missouri school districts with biracial enrollments have desegregated voluntarily, starting first in 1954 with St. Louis and Kansas City. Desegregation tended to lag in the "Bootheel" section of southeast Missouri, an agricultural area with strong cultural ties with the South. Racial records have not been kept in the state since 1954. For 1966-67, all regular school districts were in compliance with federal guidelines: two submitted court-ordered plans, 14 signed HEW-441B and all others signed HEW-441. Most of Missouri's Negroes are concentrated in the two major urban areas: St. Louis, with 44,219 white and 71,778 Negro students, and Kansas City, with 43,010 white and 31,729 Negro students. Both of these cities reported enrollments by race and the number of Negroes in schools with whites. The figures available from the USOE survey show 638 desegregated schools in the state having 289,777 whites and 82,026 Negroes. USOE estimated the state had 101,100 Negroes in schools with whites. The USOE survey follows:

**USOE Survey

In September, 1961, the Missouri Advisory Committee to the U.S. Commission on Civil Rights estimated that 125 to 150 Negro teachers in Missouri had lost their employment as teachers as a result of initial desegregation. Most of the loss was in smaller or rural communities. The major urban systems, St. Louis and Kansas City, have been hiring an increasing number of Negro teachers and have hired some Negro teachers dismissed in other localities. In May, 1954, St. Louis public schools had an instructional staff of 2,585—1,738 whites and 847 Negroes. By 1966-67 the total of 3,790 included 1,789 whites and 2,001 Negroes. In the 13 years, the proportion of Negro teachers in St. Louis had increased from about 33 per cent to 53 per cent. Kansas City public schools in 1958-59 had 2,153 teachers—1,744 whites and 409 Negroes. For 1964-65, Kansas City had 2,730 teachers—1,893 whites and 837 Negroes. In seven school years, the percentage of Negro teachers in Kansas City had changed from 19 to 31 per cent.

Public Colleges and Universities

**Estimated

The U.S. Supreme Court ordered the University of Missouri to admit a Negro in 1938 but the student never appeared to enroll (*Gaines v. Canada*). In 1950, a state circuit court ruled that qualified Negroes were to be admitted to the university whenever they applied for courses not available or of equal quality at Lincoln University. Except for the university, all public colleges and universities desegregated voluntarily. Most institutions of higher learning in Missouri say they no longer keep racial records on faculty or students. Enrollments are:

**Represents total figures and includes both Negroes and whites since a racial breakdown was unavailable.

Faculties

Seven institutions of higher learning report desegregated faculties (see table above). The number involved at the four campuses of the University of Missouri is unknown, but is reported to be "few." Several schools without Negro faculty stated in the survey that they would welcome them.

Special Schools

Trade schools, adult education programs and special schools in Missouri are officially desegregated in most instances.

Ethnic Groups

The USOE survey listed 292 "other" students in desegregated schools.

**USOE Survey

Public school desegregation began in North Carolina in September, 1957. Three city school systems—Charlotte, Greensboro and Winston-Salem—announced voluntary plans simultaneously. For 1966-67, all but 13 school districts were in federal compliance and none of those had had all federal funds stopped. The 156 districts in compliance included 11 operating under court order, 24 that had signed HEW-441, and 121 that had signed HEW-441B. The state has stopped reporting records by race and refused to release the statistics collected in the USOE survey. Figures from the USOE survey follow:

*USOE Survey			

The first districts to desegregate students—Winston-Salem, Charlotte and Greensboro—also led in starting teacher desegregation in the state, beginning in 1964-65. By the next year, 18 districts had begun teacher desegregation, and for 1966-67, all but a few of the state's 169 districts had desegregated teachers and staffs. (See table above)

*All In Compliance

The University of North Carolina has been desegregated since 1951 when five Negroes enrolled in the university law school under a court order in *McKissick v. Carmichael*. By 1964, all public colleges and universities had desegregated in practice, except one established for Indians. All the schools are in federal compliance. Enrollments are:

**Includes Indians and Whites				

Faculties

Prior to 1966-67, desegregation at this level had been limited to white teachers at two predominantly Negro schools, and Negro visiting professors at the University of North Carolina, Chapel Hill, and N.C. State University, Raleigh. This year, all five predominantly Negro schools and seven predominantly white schools have desegregated faculties. (See table above)

Special Schools

Industrial education centers are operated across the state for students beyond the high school level, although some include high school students. All have operated under a state policy requiring that race not be a factor in admission. All of these schools, whether industrial education centers, technical institutes, vocational rehabilitation centers, or community colleges, have signed HEW-441 compliance forms that have been approved by the U.S. Office of Education. (Figures in college table above include students enrolled in college parallel courses in IEC's and technical institutes.) The Governor's School, a summer project operated for talented high school students, has operated with desegregated student body and faculty. Also desegregated from the start is the N.C. School of the Arts at Winston-Salem, which provides instruction in the performing arts for both high-school and college-level students.

Ethnic Groups

Compliance with Title VI of the Civil Rights Law of 1964 marked the official end of Indian schools on a separate basis in Robeson County during the 1965-66 school year. Legal action (*Chance v. Harnett County*) in behalf of 50 Indians resulted in the closing of the Maple Grove Indian School in Harnett County in 1964-65. The Maple Grove school had opened 41 years earlier when Indian children refused to attend either all-Negro or all-white schools. Indian desegregation in the state began in 1961 in Harnett County after Indians staged a sit-in in the white Dunn School. Robeson first desegregated Indians in 1962 by admitting seven Lumbee Indians to the Lumberton Junior High School. Person County, N.C., and Halifax County, Va., closed a jointly operated Indian school, High Plains, in 1962 to save money for both counties. Sampson County and Clinton city systems desegregated Indians in September, 1963, following a suit by the Indians. The USOE survey lists 3,477 students of "other" races in desegregated schools.

Private Schools

Several private schools opened in the state in the fall, 1966, and two in particular were clear products of white resistance to desegregation: one in Wake County and one in Harnett County. The state had a tuition grant law but approval of the first grant led to a court ruling in 1966 against grants.

In Desegregated Schools	182,604	31,300	213,904
		50.8%	

*USOE Estimate

The first Oklahoma district to desegregate, Poteau, acted voluntarily on June 7, 1955. Four districts desegregated by court order and the others acted voluntarily. For 1966-67, all districts were in federal compliance: 1 under court order, 92 by signing HEW-441B and all others under HEW-441. The USOE survey listed 521 desegregated schools with 182,604 whites and 26,527 Negroes enrolled. From this USOE estimated the state had 31,300 Negroes in schools with whites. The USOE survey follows in part:

Oklahoma has 77 school districts in which both Negro and white teachers are employed. There are 4,519 white teachers and 1,067 Negro teachers working in desegregated situations. The USOE survey (see table above) lists 3,949 whites and 1,028 Negroes. An estimated 405 Negro teachers have lost their jobs because of desegregation in Oklahoma.

Oklahoma admitted its first Negro (G. W. McLaurin) to the University of Oklahoma graduate division in accordance with a U.S. District Court order on Oct. 6, 1948. (*McLaurin v. Oklahoma State Regents*). U.S. Supreme Court had held Ada Lois Sipuel was entitled to "section" clause of the 14th Amendment. (*Sipuel v. Board of Regents*). A June 9, 1949, legislative act permitted Negroes to attend white colleges for courses not given at Negro institutions, provided the Negro student remained segregated within the college. A three-judge U.S. District Court held Nov. 22, 1949, that the segregation within the OU graduate division did not deprive McLaurin of his rights under the 14th Amendment. This decision was reversed June 5, 1950, by the U.S. Supreme Court, which ruled segregated facilities within the institution deprived McLaurin of equal protection. The State Board of Regents for Higher Education then adopted a policy of admitting Negroes to any course in a white college not offered by Langs-

ton University. On June 6, 1955, the board opened all state-owned colleges and universities to qualified undergraduates of all races. College enrollments are:

Faculties

Only two institutions are known to have a desegregated staff. Langston University, predominantly Negro, has 15 whites serving with 55 Negro teachers. The University of Oklahoma, which reported "no distinction made" in declining to give numbers of Negro students and Negro faculty members, is known to have some Negroes in teaching positions.

Special Schools

Eleven institutions are administered by the State Department of Public Welfare, which reports all are desegregated. The 1963 legislature desegregated the three schools for the mentally retarded. Commitments to the state training school and homes for dependent and neglected children are made by county judges without regard to race and are accepted by the welfare department on that basis. The department reports its records do not show a racial breakdown by institution.

Ethnic Groups

This has never been an issue in Oklahoma. Indians and other non-whites attend white schools. There are about nine Indian boarding schools operated by the federal government. Indians, many of whom are from out of the state, attend them as a matter of choice because room and board are free. The USOE survey lists 6,349 students of "other" races in desegregated schools.

*USOE Survey **USOE and State figures

The first district to desegregate, Charleston District 20, admitted Negroes to its high schools with whites in September, 1963, by federal court order (*Brown v. School District 20*). Clarendon County District One, which desegregated in 1965, had remained under a federal court order to desegregate "with all deliberate speed" in a case dating back to the original School Segregation Case in the U.S. Supreme Court in 1954 (*Briggs v. Elliott*). For 1966-67, the state had 89 districts in compliance: six operated under court orders and 83 signed HEW-441B (None used form HEW-441). One of the 18 non-compliance districts, Calhoun Co. No. 2, has had all federal funds stopped. The state reported 11,710 Negroes attending formerly all-white schools. The USOE survey listed 536 desegregated schools attended by 289,193 whites and 14,528 Negroes, and from this USOE estimated the state had 14,800 Negroes in desegregated schools. Combining the figures in the table below with those additional ones available from the state, gives the state 14,853 Negroes attending schools with whites.

On Desegregated Facilities**	2,946	3,261	6,207

*Estimated racial breakdown made from official total

**USOE Survey

A few schools desegregated teaching staffs in 1965-66 and widespread faculty desegregation began in 1966-67. Some districts employ teachers parttime in school for the opposite race, others have teachers or consultants who work in schools of both races, but the majority have at least some teachers who work full time in a school of the opposite race. See table above.

Public Colleges and Universities

Clemson College became the first South Carolina institution of higher learning to desegregate, admitting a Negro in January, 1963, by federal court order in

Gant v. Clemson. Desegregation of the University of South Carolina soon followed and currently all of the state-supported institutions are desegregated. South Carolina has the only institution at this level that has been found not in compliance and had all federal aid stopped. The school is Anderson College, supported by the Southern Baptist Church and located at Anderson, S.C. Enrollment at the public institutions are:

Faculties

The faculty at Clemson University was desegregated in 1965 and it is thought that there are biracial faculties at one or two other institutions.

Special Schools

The S.C. Commission on Technical Education, which began in 1962-63, has never had a segregation policy. All of its 10 centers are open to students of all races.

Whitten Village, the institution for mentally-retarded children, and the S.C. School for Deaf and Blind, desegregated in 1966.

Ethnic Groups

With the beginning of the 1961-62 school term, Sumter County school officials closed the last separate school operated for "Turk" children of the Dalzell Community. These dark-complexioned youngsters were part of an ethnic enclave said to comprise descendants of Turks and others of Mediterranean extraction who settled there after service with Gen. Thomas Sumter in the American Revolution. The Turks had been listed as "whites" in marriage ceremonies, military service and otherwise, but had been provided separate schools. Turks have been admitted to the Hillcrest High School for whites since 1951, and now are scattered throughout the white schools of the district and county without distinction. The USOE survey listed 5,458 "other" students in desegregated schools. The public colleges have 101 "other" students.

Private Schools

Private schools have grown rapidly in the state, with 28 new ones formed in the past three years. A temporary injunction has stopped the use of state tuition grants and private-school supporters are not counting on their availability again. The private schools have an enrollment of about 4,500 students.

		28.6%	

Oak Ridge in 1955 became the first Tennessee district to desegregate. Then under federal control, the district voluntarily desegregated all grades. Clinton High School in Anderson County, under a 1956 federal court order, was the first regular district in the state to begin biracial classes. Violence erupted at Clinton and National Guard troops restored order. With the opening of school for the 1966-67 term, all but two of Tennessee's districts were in compliance with current federal desegregation guidelines: Franklin city and Tipton County, the latter of which was involved in federal court desegregation litigation. Both districts were desegregated, however. Of the 148 districts in compliance, 66 signed HEW-441, 18 followed court orders, and 64 signed HEW-441B. The State Department of Education released desegregation figures in November, 1966, for 150 of the 151 school districts. Those figures, plus an estimate for the missing district, Tipton County, show the state had 52,691 Negroes in schools with whites, or 28.6 per cent of the state's total Negro enrollment. The U.S. Office of Education reported from its November survey that the state had an estimated 54,600 Negroes in desegregated schools. The number of desegregated schools totaled 882 in 1966-67, compared with 771 in 1965-66 and about 300 in 1964-65. The state department report also showed:

● Of 1,983 schools in 150 districts, 818 have both an all-white student body and an all-white faculty; 137 an all-Negro faculty and student body; 433, both faculty and student desegregation; 442 schools desegregated among students only; 51 all-white schools and 100 all-Negro schools that have faculty desegregation; and two predominantly Negro schools with all-white faculties.

● The number of Negro students in predominantly Negro schools totaled 24,839, and the number of Negroes in predominantly white schools, 27,552. White students in predominantly white schools totaled 418,390 while 4,794 other whites attend predominantly Negro schools.

● All of Tennessee's districts are desegregated, with 86 systems reporting all of their Negro students attending biracial schools.

Here is a district-by-district tabulation of both student and faculty desegregation:

TOTALS693,143 184,511 52,691 882 3,673 10,250

* Estimates; Tipton County made no report to state or federal officials. School authorities said the figures were unavailable, except on estimated basis, and noted that the district is involved in desegregation litigation.

Teachers

	White	Negro	Total
Teachers*	28,629	6,251	34,880
On Desegregated			
Faculties	10,250	3,673	13,923

*Estimated

Teacher desegregation, which had been reported in only nine of Tennessee's 151 districts in 1964-65, showed a sharp increase with the opening of the 1966-67 school year. Of the state's estimated 34,800 teachers, a total of 13,923—or 40 per cent—are now assigned to biracial faculties. These include 10,250 white teachers and 3,673 Negro teachers. In addition, 110 Negro staff members are serving with 1,552 whites on central office staffs of local education departments in the state. Teacher desegregation was reported in a total of 108 districts. In 1965-66, 476 Negro teachers and about 2,700 white teachers were assigned to biracial faculties in 44 districts.

Public Colleges and Universities

	Predom. White	Predom. Negro
Institutions*	7	1
Enrollment	62,839	5,614
Negroes in Biracial Schls.	1,128**	5,599**

*All in Compliance

**Estimated

All eight state-supported colleges and universities have desegregated. The University of Tennessee was the state's first institution of higher learning to desegregate, admitting Negroes to the graduate, professional and special levels under federal court order in

1952 (*Gray v. University of Tennessee*). In 1957, the State Board of Education adopted a policy removing race as a factor in admissions. The college and university student and teacher desegregation in Tennessee follows:

	Enrollment*		Teachers	
Predominantly White	White	Negro	White	Negro
Austin Peay St.	2,767	127	104	0

Predominantly Negro				
Tenn. A&I Univ.	15	5,599	31	197

STATE TOTALS61,726 6,727 2,926 207

*Estimates; no figures reported by race in state-supported colleges and universities.

**Figures include main campus at Knoxville, branches at Martin, Memphis, Nashville and other U.T. centers.

Faculties

For the first time faculty desegregation has been reported at three of the predominantly white colleges and universities. Four others listed no Negroes on their faculties. Tennessee A & I University at Nashville, a predominantly Negro institution, was the first state-supported university to desegregate its faculty several years ago. (See table above.)

Special Schools

State officials reported that all of Tennessee's special schools are desegregated in practice or policy and have received federal approval of their plans. They include the Tennessee School for the Blind near Nashville which desegregated in 1962; the School for the Deaf at Knoxville; Tennessee Preparatory School at Nashville, desegregated in 1965-66; and Alvin C. York Institute at Jamestown. The Tennessee Youth Center at Joelton, a state corrections facility for training young law offenders, as well as numerous regional vocational and technical schools operated by the State Board of Vocational Education also are desegregated. Biracial classes have been conducted for several years in Nashville, Chattanooga, Knoxville and other school systems in special programs for the educable mentally retarded, speech and hearing and others.

Ethnic Groups

Tennessee has no desegregation programs involving students other than Negroes. The state has 338 Mexicans and Indians among its 877,654 students in elementary and high schools, but these have been enrolled with white students without reference to racial factors. Some non-whites also have been admitted for several years to Tennessee's public colleges and universities. The USOE survey lists 2,059 "other" students in desegregated schools.

Private Schools

Desegregation is known to have caused the formation of four private schools, all in West Tennessee. Members of the Jackson, Tenn., Citizens' Council organized the Huntersville Private School, now in its third year. One opened in heavily Negro Fayette County (Somerville) during the 1965-66 year, and two opened in the fall, 1966, at Martin in Weakley County and Covington in Tipton County.

**USOE Survey

Public school desegregation began in Texas before the 1954 Supreme Court decision on segregation. Friona, in West Texas, admitted Negroes to schools with whites in 1953. In 1954, Texas courts held that the state constitution's requirement for segregation in public schools was void. More than 100 public schools desegregated by board action before the Texas legislature in 1957 required referendum approval for desegregation, with loss of state funds as the penalty (Ch. 283). This slowed desegregation until 1963, when State Attorney General Will Wilson declared the referendum law unconstitutional. About 15 districts have desegregated by court order, and the others acted voluntarily. For 1966-67, all but six school districts were in federal compliance: 757 signed HEW-441, 15 operated under court orders, and 534 signed HEW-441B. Texas Education Agency released a desegregation report based on returns covering 90 per cent of the school population. It showed 132,467 Negroes (of 283,426 reported) attending desegregated schools with 718,536 whites (of 1,875,352 reported). TEA refused to release district-by-district figures. The USOE survey listed 2,343 desegregated schools attended by 1,089,842 whites and 131,791 Negroes, and from this USOE estimated the state had 159,400 Negroes attending schools with whites. The USOE survey follows:

Faculties**	24,088	7,350	31,438

*Estimated
**USOE Survey

A number of Negroes have lost teaching jobs through desegregation in Texas, but local administrators have helped displaced teachers find new positions. Texas Education Agency announced in November, 1966, that of 10,137 Negro teachers reported, 1,730 taught on desegregated campuses, 225 were on all-white campuses, and 303 were on predominantly white campuses. Of the 83,134 white teachers reported, 365 taught on all-Negro campuses and 129 were at predominantly Negro campuses. Reports to the USOE listed 24,088 whites and 7,350 Negroes on desegregated faculties. (See table above.)

*All In Compliance

The University of Texas, first in the state to desegregate, acted under court order in 1950 in *Sweatt v. Painter*. All 56 tax-supported institutions of higher education in Texas have abolished segregation policies and, for the first time, every institution reports at least one Negro student in its enrollment. On the other hand, Prairie View A&M officials report that the school has returned to an all-Negro status after losing its one white student enrolled last year. Another all-Negro institution, Tyler District College, was disbanded last June and was consolidated with its main branch, Tyler Junior College, once all-white. Three Negro teachers from the defunct school were employed by Tyler Junior College—its first step toward faculty desegregation. Tyler Junior College, however, reported no appreciable increase in its Negro population, which led some education authorities to believe that many of the 190 or more Negroes from Tyler District College had transferred to private Negro schools nearby. Many institutions reported it was virtually impossible to estimate racial enrollment accurately because of the absence of reliable records. Several noted that the federal government had discouraged such racial tallies and apparently many are now avoiding any such record-keeping, which was once considered discriminatory.

Faculties

Five Texas senior colleges currently employ Negro faculty members. The University of Texas appointed two in 1964 and now reports that it probably has employed a handful of Negro teaching assistants. University officials say they cannot ascertain this because of the school's policy against keeping racial data on its personnel. Other institutions employing one Negro faculty member each include: Sam Houston, Texas Western, East Texas, and Lamar (parttime). Meanwhile all Negro Prairie View A&M has 12 white faculty members on its 186-member staff. Texas Southern University's faculty is about three-fourths Negro and one-fourth non-Negro, including whites and Orientals. St. Phillip's, a predominantly Negro junior college, has about one-fourth white teachers on its faculty. The rapid enrollment increases in Texas' junior colleges—and the construction of several new ones—apparently have prompted in part the hiring of several Negro teachers. Six of Texas' 36 junior and community colleges employ Negroes, including Tyler, 3; Dallas, 2; San Antonio, 2; McClennan, 2; Texarkana, 1; and San Jacinto, 1 (parttime). Most institutions in Texas reported that they had no policy against hiring Negroes. Several said they had actively recruited with no success for qualified Negro teachers. In the main, the faculty color line is still unbroken except in predominantly Negro schools.

Special Schools

Desegregated special schools in Texas include Abilene State School (epileptics), Austin State School and Mexia State School (mentally retarded), Moody State Home (cerebral palsy), Bexar County Boys School and Mountain View School for Boys, Coryell County. All these are accredited as independent school districts.

Ethnic Groups

Enrollment of non-Negroes in formerly all-Negro schools shows varied patterns. Many public schools have speeded their desegregation because of federal aid programs, and this also may be responsible for each tax-supported institution of higher education showing at least one Negro student. Real desegregation in public schools seems to be growing largely in marginal neighborhoods that have Negro, Latin-American and/or white families. In other places, however, changing racial patterns are decreasing integration, as non-Negro families move to areas with a few or no Negroes; and by reverse process some pockets of Negro population are moving out of school attendance zones that would require them to send children to predominantly white schools. The USOE survey listed 25,054 students of "other" races in desegregated schools.

**USOE Survey

Desegregation began in Virginia in February, 1959, when the state abandoned its "massive resistance" program and four school divisions—Alexandria, Arlington, Norfolk and Warren County—accepted Negroes in schools with whites under court order. Nine schools in three communities—Charlottesville, Norfolk and Warren County—had closed in the fall, 1958, to evade desegregation orders. When these schools re-opened, Charlottesville received court permission to delay desegregation until the fall, 1959. Prince Edward County kept all public schools closed from the summer, 1959, to fall, 1964, in an effort to avoid a desegregation order dating from the original School Segregation Cases of 1954 (*Davis v. Prince Edward County*). Since 1959, most Prince Edward white children have attended a private, segregated school system. The Negroes had no schools except during 1963-64, when a privately financed free school operated through the co-operation of federal, state and county officials (Prince Edward Free School Association). Only seven whites returned to the re-opened public schools for 1964-65, with some 1,500 Negroes, and about a dozen white enrolled in 1965-66 and 1966-67. In Surry County, all white pupils have boycotted the public school system since the State Pupil Placement Board first assigned Negroes to the all-white school for September, 1963. The whites attend a private, segregated school. The 1966 General Assembly abolished the Pupil Placement Board, leaving pupil assignment solely in hands of local school boards. The U.S. Office of Education lists 135 Virginia divisions, but includes special town districts that do not operate independent systems. Of the 135 divisions and districts, 15 signed HEW-441, 20 submitted court-order plans, and 92 signed HEW-441B, and 8 have unacceptable plans. The state reported that 48,070 Negroes were attending formerly all-white schools and 7,120 whites were attending formerly all-Negro schools, but gave no figures on how many Negroes were in the desegregated, formerly all-Negro schools. The state also would not make available the district-by-district figures. The USOE survey showed the state had 979 desegregated schools with 551,483 whites and 57,101 Negroes, and from this, USOE estimated the state had 61,500 Negroes in desegregated schools. The USOE survey follows:

*Includes several estimates

Faculties

Several whites are on the faculties of the two predominantly Negro schools, Virginia State at Petersburg and Norfolk. Faculty segregation is maintained at the predominantly white institutions.

Special Schools

Adult vocational programs in various communities have desegregated.

Ethnic Groups

The State Board of Education in 1966 ceased operating two schools for Indians at reservations. The Indians were transferred to regular public schools. The USOE survey lists 952 students of "other" races attending desegregated schools.

Private Schools

The state has about 30 private, segregated schools established because of desegregation. The largest, the Prince Edward School Foundation, enrolls about 1,200 students. Annual tuition grants of \$250 (elementary)' and \$275 (high school) are shared by the state and localities.

**USOE Survey

Desegregation was first started in the Monongalia County public schools in the fall of 1954. All districts are in federal compliance: 48 signed HEW-441, two follow court orders, and five signed HEW-441B. The State Department of Education keeps no records by race and refused to retain any copies of reports submitted in the USOE survey. The USOE survey listed 431 desegregated schools with 142,168 whites and 15,320 Negroes. From this, USOE estimated the state had 21,300 Negroes in schools with whites. The USOE survey follows:

Faculties

Bluefield and West Virginia State started hiring white instructors in 1960-61. For faculty desegregation, see table above.

Special Schools

The 1967 legislature dropped race restrictions for admission to the West Virginia School for the Deaf and Blind, and the special schools at the Boys and Girls industrial schools are desegregated. The former Negro industrial schools have been closed and the children sent to the previously all-white institutions.

Ethnic Groups

The West Virginia Human Rights Commission has reported that Barbour and Taylor counties had a group of non-whites known locally as "Guineas." They have resisted the designation "colored," and prior to desegregation they refused to attend Negro schools. The USOE survey lists 58 "other" students in desegregated schools.

Status Before 1954

When the U.S. Supreme Court first ruled in the school segregation cases on May 17, 1954, 17 Southern and border states, plus the District of Columbia, maintained segregated elementary and high schools by law, except in some communities having only a few Negro children to educate from time to time, or those allowing a few Negroes to attend special courses. Districts known to have had biracial classes before the 1954 decision were Arden and Claymont, Del., Baltimore, Md., and Friona, Tex., involving about 66 Negroes total. Six Southern states and all six border states had begun college desegregation before 1954. Four states outside the region — Arizona, Kansas, New Mexico, and Wyoming — allowed varieties of local segregation. Sixteen states had laws prohibiting segregation but not all enforced them. Eleven other Northern and Western states had no laws on the subject. The "School Segregation Cases" were *Oliver Brown et al v. Board of Education of Topeka, Kan., et al*; *Harry Briggs Jr. et al v. R. W. Elliott et al* (Clarendon County, S.C.); *Dorothy E. Davis et al v. County School Board of Prince Edward County, Va., et al*; *Francis B. Gebhardt et al v. Ethel Louise Belton* (New Castle County, Del.); and *Spottswood Thomas Bolling et al v. Melvin Sharpe et al* (District of Columbia). The Supreme Court's implementing decision was delivered May 31, 1955.

Statistical Developments From 1954

Note: These tables contain the best available figures for each respective school year. The figures in these tables differ in some instances from those given in past issues of Southern School News or the Statistical Summary because of corrections to conform to a consistent policy on statistics, or substitutions of more accurate information that became available later.

†The sum of adding the districts "In Compliance" and "Not in Compliance" will not always equal the total number of districts because the Office of Education reports a different number of districts from that of some of the state departments of education.

††The number of Negroes in schools with whites, compared to the total Negro enrollment.

For Education Decision-Makers . . .

A New, Attractive, Clearly Written
Magazine, Continuing the Objectives
Of Southern Education Reporting Service

SOUTHERN EDUCATION REPORT

SOUTHERN EDUCATION REPORT is focused on programs to expand educational opportunities for the socially and economically handicapped in the Southern and border states.

SOUTHERN EDUCATION REPORT is factual, objective and to-the-point, clearly written and attractively presented. Its reporting is first-hand —by experienced reporters.

SOUTHERN EDUCATION REPORT directs its interest toward any promising concept in education anywhere in the nation.

SOUTHERN EDUCATION REPORT includes major developments in desegregation of schools and colleges.

Published ten times a year, including July-August and January-February issues

One year (10 issues), \$3; two years (20 issues), \$5.50.

Groups: five or more copies to different addressees, \$2.50 each per year; five or more copies to one addressee, \$2.25 each per year.

Add 75 cents per year for orders to be sent outside the United States.

Single copies, any issue, 50 cents each. Ten or more copies, any one issue, to one addressee, 40 cents each.

ADDRESS: Southern Education Report, Box 6156, Nashville, Tenn. 37212
